Education

Gyan Ganga Institute of Technology & Science

2024 - 2028

Bachelor of Technology in Artificial Intelligence and Machine Learning (CGPA: 7.53)

Jabalpur, (M.P)

- **Core Subjects:** Data Structures and Algorithms (C++), Prob & Stat, Object-Oriented Programming Methodology, Artificial Intelligence, Machine Learning, Deep Learning,

Experience

Cisco AICTE Virtual Internship

March 2026 – August 2026

Artificial Intelligence

Jabalpur, (M.P)

- Data Analysis & Modeling: Applied foundational data science and analytics workflows to structure raw data, extract insights, and present key performance metrics.
- Applied AI & Sentiment Analysis: Implemented AI-driven text analysis tools to evaluate unstructured customer reviews, extracting customer sentiment and operational insights.
- Data Visualization: Built datasets and visual representations to translate complex data findings into actionable technical reports.

Projects

Project 1 – URL Shortener | React, Tailwind CSS, Express, MongoDB

- Developed REST API to convert long URLs into short links.
- Implemented MongoDB for storing URL mappings.
- Handled redirection and routing efficiently.

Project 2 – Todo App | React, Tailwind CSS

- Built a task management app with add, edit, delete, and checkbox features.
- Used localStorage to persist user data.
- Designed responsive UI using Tailwind CSS.

Project 3 – ML Project (Sales Analysis / Prediction) | Python, Pandas, Matplotlib, Seaborn, Numpy

- data cleaning and visualization using Pandas and Matplotlib.
- Built ML model for prediction.
- Evaluated model using accuracy metrics.

Technical Skills

Programming Languages: HTML, CSS, JavaScript, Python and C++

Technologies: React.js, Tailwind CSS, Next.js, Node.js, Express.js, Redux, Fast API, Flask, Redux, Bootstrap, Git & Github, Docker, Linux,

Soft Skills: Communication, Problem-Solving, Teamwork, Time Management, Adaptability, Self-Discipline
